

JOB DESCRIPTION

Job Title: R&D Specialist - Polymer

Pay Rate / Schedule: Salary Exempt

Salary to be Determined Commensurate with Experience

Hours: Day Shift

Location: Bryan, Texas

Summary Description: Formulate and synthesize Polymers for PSA products. This includes formulating new products as well as improving existing products.

General Duties:

This position is responsible for:

- Research and Development of new formulations
- Improvement to present formulations
- Utilizing new and more efficient raw materials
- Assisting with customer service
- Working with customers for new product trials and field technical service
- Selecting, calibrating, installing and maintaining lab equipment
- Other related duties as assigned by management
- Creating written standard operating procedures for laboratory controls and equipment

Qualifications:

- Experience formulating and synthesizing polymer (acrylic) for PSA.
- First hand familiarity with PSA and PSA tape applications.
- Bachelors Degree in chemistry from an accredited four year university/college.
- Knowledge of raw materials used in PSA products.
- Organized and detail oriented.
- Proficient with Windows based software, including databases.
- Demonstrated ability to work with hazardous chemicals.
- Good mechanical inclination, as well as the physical ability to lift and move material such as 55lb (25kg) packages and 55 gallon drums.
- Good verbal and written skills for internal and external communication.
- Strong research capabilities for new technology related to position's responsibilities.
