### **TOYO INK PREMIERES HIGH-QUALITY WATERLESS INK FOR CONVENTIONAL SHEETFED OFFSET AND DIGITAL PRESSES**

ADDISON, Ill. — TOYO INK America at Graph Expo & Converting Expo 2006 will introduce a premium process-color ink series specially formulated for sheetfed offset printing applications. The Aqualess Ultra Process Series satisfies the unique operating requirements for high-quality waterless printing. It is compatible with conventional sheetfed presses and digital presses, including KBA's 74 Karat press.

Aqualess Ultra features an optimum balance of resin, pigment, solvent and other additives to perform well in varying operating environments. It easily handles the ink delivery system, temperature, roller system and plate requirements of waterless presses.

Aqualess Ultra comes up to full color quickly for fast makereadies and reduced materials waste. It has an extremely fast setting speed for quick handling and short cycle times.

Aqualess Ultra transfers smoothly onto printing plates. It is able to print a sharp dot and resists abrasions on a wide range of stock types. It also is suitable for a wide range of ink densities.

Aqualess Ultra is available in medium tack (M Tack Series) and low tack (L Tack Series) for a variety of paper stocks.

The Aqualess Karat Process Series has been certified by German press manufacturer KBA for use on the 74 Karat, a four-color, waterless offset DI press designed for short-run to medium-run projects.

TOYO also offers a complementary line of Pantone base colors and blended colors in waterless formulation.

For complete details about the Aqualess Ultra Process Series, visit Booth #2406 at Graph Expo & Converting Expo 2006.
